Summary

A highly motivated final-year Information Technology student with a strong interest in full-stack development. Proficient in front-end technologies like HTML and CSS, and eager to expand expertise in web development. Passionate about leveraging new technologies and building practical coding solutions to contribute effectively to organizational success in an internship position.

Work Experiences

Data Science and AIML Intern
YBI Foundation

Gained hands-on experience as a Data Science and AIML Intern, applying machine learning principles and data analysis techniques. Contributed to initiatives related to data science.

Projects 1

Fingerprint Analysis using Streamlit

Developed a fingerprint analysis application utilizing Streamlit, demonstrating proficiency in Python-based web frameworks for data processing and visualization.

Streamlit
